- ☺ 综述
- ☺ 软件评论

三大检索数据库——ISTP

- ☺ 科学技术会议录索引 Conference Proceedings
Citation Index - Science (CPCI-S)
 - 1990-至今
- ☺ 社会科学与人文学会议录索引 Conference
Proceedings Citation Index - Social Science &
Humanities (CPCI-SSH)
 - 1990-至今

三大检索数据库——EI

- ☺ 工程类文摘数据库
- ☺ 收录期刊、会议论文、技术报告等
- ☺ 学科范围：化学工程，土木工程；电子/电气工程，机械工程，冶金、矿业、石油工程，计算机工程和软件。
- ☺ 今年剔除了扩展刊源

二、写作前的文献准备

- ☺ 某一方面的研究以前都有什么人做过？结论是什么？
- ☺ 同一研究领域是否用了不同的方法展开研究，哪种方法更合理？或者更普遍？
- ☺ 现在人们对这方面的研究有什么最新进展和认识？
- ☺ 同一研究领域的重点文献、最新文献和经典文献？
- ☺ 同一研究领域的主要发表期刊是什么？

文献检索

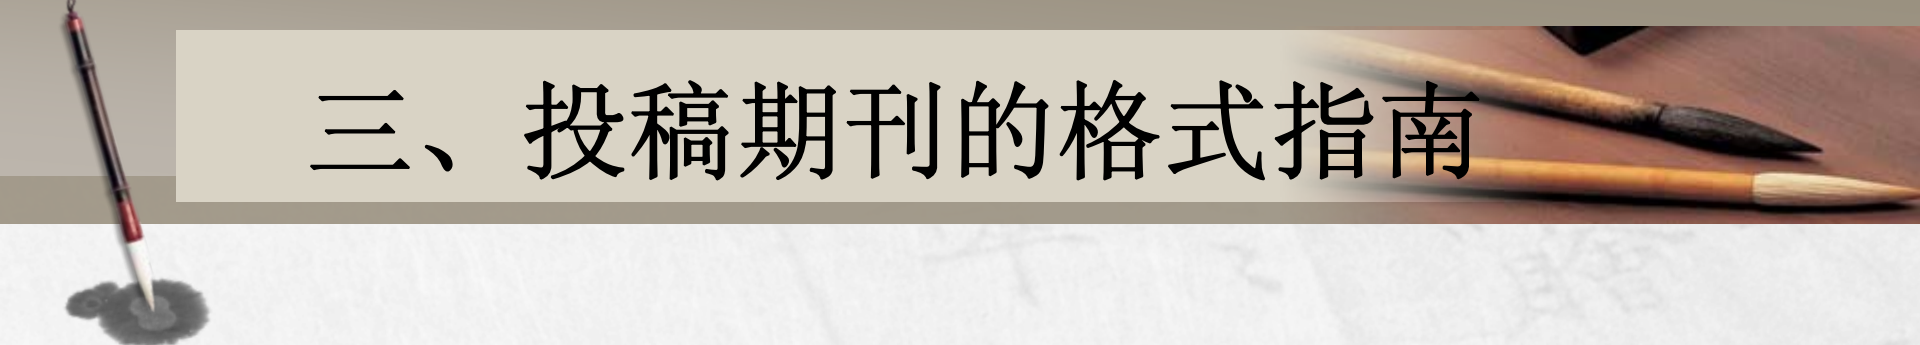

☺ 检索文摘数据库

- web of science、CSA
- 工程文摘EI
- 科学文摘INSPEC
- 生物文摘BP
- 地学文摘库GEOREF、GEOBASE

☺ 注重参考文献和引文

☺ 文献检索原则

- 查找全面的文献、文献的回溯、最新的进展

Forest Ecology and Management

An International Journal

ISSN: 0378-1127
Imprint: ELSEVIER

Guide for Authors

An International Journal

Forest Ecology and Management publishes scientific articles that link forest ecology with forest management, and that apply biological, ecological and social knowledge to the management and conservation of man-made and natural forests. The scope of the journal includes all forest ecosystems of the world. A refereeing process ensures the quality and international interest of the manuscripts accepted for publication. The journal aims to encourage communication between scientists in disparate fields who share a common interest in ecology and forest management, and to bridge the gap between research workers and forest managers in the field to the benefit of both. Authors should demonstrate a clear link with forest ecology and management. For example, papers dealing with remote sensing are acceptable if this link is demonstrated, but not acceptable if the main thrust is technological and methodological. Similarly, papers dealing with molecular biology and genetics may be more appropriate in specialized journals, depending on their emphasis. The journal does not accept articles dealing with agro-forestry. The journal does not recognize 'short communications' as a separate category.

Online Submission of manuscripts

Submission of an article implies that the work described has not been published previously (except in the form of an abstract or as part of a published lecture or academic thesis) that it is not under consideration for publication elsewhere

Ecology Letters

[Published in association with the Centre National de la Recherche Scientifique \(CNRS\)](#)**Edited by:**
Marcel Holyoak**ISI Journal Citation Reports® Ranking:** 2007: 4/116 (Ecology)
Impact Factor: 8.204

Ecology Letters is a forum for the very rapid publication of the most novel research in ecology. Manuscripts relating to the ecology of all taxa, in any biome and geographic area will be considered, and priority will be given to those papers exploring or testing clearly stated hypotheses. The journal publishes concise papers that merit urgent publication by virtue of their originality, general interest and their contribution to new developments in ecology. We discourage purely descriptive papers and those merely confirming or extending results of previous work.

Three types of article are published in *Ecology Letters*:

- **Letters:** exciting findings in fast-moving areas

Statistics

Impact Factor: 1.549
Issues per year: 12

The journal is concerned with extending and integrating the study and management of "nature's household" (ecology) and "humankind's household" (economics). This integration is necessary because conceptual and professional isolation have led to economic and environmental policies which are mutually destructive rather than reinforcing in the long term. The journal is transdisciplinary in spirit and methodologically open.

Specific research areas covered include: valuation of natural resources, sustainable agriculture and development, ecologically integrated technology, integrated ecologic-economic modelling at scales from local to regional to global, implications of thermodynamics for economics and ecology, renewable resource management and conservation, critical assessments of the basic assumptions underlying current economic and ecological paradigms and the implications of alternative assumptions, economic and ecological consequences of genetically engineered organisms, and general management, alternative principles for valuing natural resources and environmental services accounts, methods of implementing efficient environmental policies, case studies of economic-ecologic conflict or harmony, etc. New issues in this area are rapidly emerging and will find a ready forum in *Ecological Economics*.

Ecological Economics Sections

All submissions to *Ecological Economics* are reviewed using the general criteria of quality, creativity, originality, accuracy, and contribution to the field. There are several categories of articles to allow for a full range of constructive dialogue.

News and Views

Topical and timely short pieces reviewed by the editor and/or one outside reviewer at the editor's discretion. May include editorials, letters to the editor, news items, and policy discussions. Maximum 1500 words (600 words for letters).

Commentary

Essays discussing critical issues. Reviewed by three outside reviewers with the criteria weighted toward quality of the exposition and importance of the issue. Maximum 5000 words.

Surveys

Examination and review of important general subject areas. Reviewed by three outside reviewers with the criteria weighted toward importance of the subject and clarity of exposition. Maximum 8000 words.

Methodological and Ideological Options

Research articles devoted to developing new methodologies or investigating the implications of various ideological assumptions. Reviewed by three outside reviewers with criteria weighted toward originality and potential usefulness of the methodology or ideological option. Maximum 8000 words.

Analysis

Research articles devoted to analysis of important issues. Reviewed by three outside reviewers with the criteria weighted toward originality, quality, and accuracy of the analysis, and importance of the question. Maximum 8000 words.

Book Reviews

Reviews of recent books in the field. Reviewed by one outside reviewer with criteria weighted toward clarity and accuracy of the review, and importance of the book to the field. Maximum 1200 words.

Aims & Scope

Editorial 29:1 - 'All Change?' Giles Foody

IJRS: 30th Anniversary offer - Free access to the 6 most cited articles of 2007-2008 plus 6 review articles.

Editorials free to view online

Special Issue: Montreal Protocol - Call for Papers

The *International Journal of Remote Sensing* is concerned with the science and technology of remote sensing and the applications of remotely sensed data in all major disciplines. Principal topics are: data collection, analysis, interpretation and display; surveying from space, air and water platforms; sensors; image processing; use of remotely sensed data; economic surveys and cost-benefit analyses. The journal contains primary papers on basic science, techniques and applications, and a section of Remote Sensing Letters containing material that merits fast publication.

办刊宗旨

Free Use of Colour

We are pleased to announce that from 2009, *IJRS* has the capacity to publish free colour in print for its authors - providing that the figure warrants colour, and is used in situations where it is necessary on scientific, and not merely cosmetic, grounds. Final decision will be at the Editor-in-Chief's discretion.

Readership

读者群

Scientists, engineers and managers interested in geophysical parameters, mapping, environmental monitoring, natural renewable and non-renewable resources and pollution.

Instructions for Authors

The *International Journal of Remote Sensing* is an international peer-reviewed journal published since 1980 by Taylor & Francis in collaboration with the Remote Sensing & Photogrammetry Society in electronic and print editions.

评议制度

The *International Journal of Remote Sensing* is concerned with the theory and practice of remote sensing and the applications of remotely sensed data in all major disciplines. The *IJRS* has wide range of interest, but the principal topics are: data collection, analysis, interpretation and display; surveying from space, air and water platforms; sensors; image processing; use of remotely sensed data; economic surveys and cost-benefit analyses. The journal contains primary research papers on basic science, techniques and applications, review articles, short technical notes and a section of Remote Sensing Letters containing material that merits fast publication. Many papers feature illustrations in colour.

1. Introduction

The impact of all scientific papers, and the effectiveness of the search-and-retrieval capabilities offered by their electronic publication will depend upon the care used by authors in preparing their manuscripts. It is essential that authors prepare manuscripts according to the *IJRS*' established format and style specifications. These are detailed below, in Section 5, and its associated documentation.. Failure to follow these specifications will result in your paper being delayed during, or even rejected from, the peer review process.

遵从投稿指南的重要性

Therefore, prospective contributors should carefully read the instructions for authors fully before preparing a manuscript for submission, and to check the manuscript for compliance with these specifications before submitting it for consideration for peer review.

2. Submitting a Paper to *International Journal of Remote Sensing*

Papers for consideration for peer review must be submitted via the *International Journal of Remote Sensing's* Manuscript Central site. New authors will be requested to create an account on the site before submitting their manuscript. Once a user is logged onto the site submissions should be made via the Author Centre. A helpdesk and an online user guide are accessible from this site.

No other form of submission will be accepted.

只接受在线投稿

3. General Guidelines

The *International Journal of Remote Sensing* considers all manuscripts on the strict condition that they have been submitted only to the *International Journal of Remote Sensing*, that they have not been published already, nor are they under consideration for publication or in press elsewhere. Authors who fail to adhere to this condition will be charged with all costs which *International Journal of Remote Sensing* incurs and their papers will not be published.

承诺非一稿多投

Free Use of Colour

We are pleased to announce that from 2009, *IJRS* has the capacity to publish free colour in print for its authors - providing that the figure warrants colour, and is used in situations where it is necessary on scientific, and not merely cosmetic, grounds. Final decision will be at the

对语言的要求

- For all manuscripts non-discriminatory language is mandatory. Sexist or racist terms should not be used.
- Length of the different types of papers:
 - **Research papers** are typically between 5000 and 8000 words debating and exploring theoretical and methodological issues, methodological approaches and substantive topics. However, there is not necessarily any lower or upper limit on length.
 - **Remote Sensing Letters** offers authors a route for rapid communication of advance results of research and application, and may later become the subject of a full paper. The Editor-in-Chief should treat requests for revision as a matter of priority: in turn, both the Letter and the Letter to the Editor should be handled as a matter of priority. Letters must not exceed 8 printed pages of the Journal (the equivalent of 2000 words including tables, figures and references) and will normally be published within four months of acceptance.
 - **Technical Notes** are designed as a medium for the publication of short communications that, however, do not require the fast-track publication route offered for Letters. Technical notes are typically between the equivalent of 1000 and 2000 words.

不同文献类型的要求

Papers are normally published in English, but manuscripts in French and German are acceptable for consideration at the discretion of the Editor-in-Chief.

- Manuscripts should be single-spaced throughout including the reference section, with wide (3 cm) margins.
- Abstracts of 100-150 words are required for all papers submitted.
- Manuscripts should be compiled in the following order: title page; abstract; main text; acknowledgments; appendixes (as appropriate); references; table(s) with caption(s) (can be uploaded separately); figures with caption(s) (can also be uploaded separately).
- Section headings should be concise and numbered sequentially, using a decimal system for subsections.
- Authors must adhere to SI units. Units are not italicised
- When using a word which is or is asserted to be a proprietary term or trade mark authors must use the symbol ® or TM or alternatively a footnote can be inserted using the wording below:

This article includes a word that is or is asserted to be a proprietary term or trade mark. Its inclusion does not imply it has acquired for legal purposes a non-proprietary or general significance, nor is any other judgement implied concerning its legal status.

- Where correct terminology for geographical names is concerned we refer you to the United Nations website, at http://unstats.un.org/unsd/geoinfo/about_us.htm
- **Special Issues - Advice to Guest Editors**

4. Copyright

It is a condition of publication that authors assign copyright or license the publication rights in their articles, including abstracts, to Taylor & Francis. This enables us to ensure full copyright protection and to disseminate the article, and of course the Journal, to the widest possible readership in print and electronic formats as appropriate. Authors retain many rights under the Taylor & Francis rights policies, which can be found at www.informaworld.com/authors_journals_copyright_position. Authors are themselves responsible for obtaining permission to reproduce copyright material from other sources.

Exceptions are made for authors of Crown or US Government employees whose policies require that copyright cannot be transferred to other

4. Copyright

It is a condition of publication that authors assign copyright or license the publication rights in their articles, including abstracts, to Taylor & Francis. This enables us to ensure full copyright protection and to disseminate the article, and of course the Journal, to the widest possible readership in print and electronic formats as appropriate. Authors retain many rights under the Taylor & Francis rights policies, which can be found at www.informaworld.com/authors_journals_copyright_position. Authors are themselves responsible for obtaining permission to reproduce copyright material from other sources.

Exceptions are made for authors of Crown or US Government employees whose policies require that copyright cannot be transferred to other parties. We ask that a signed statement to this effect is submitted when returning proofs for accepted papers.

- Further details and FAQs on Taylor & Francis's policy on copyright and authors' rights

For details on copyright permission [click here](#). Copies of the permission letters should be sent with the manuscript to the Editors.

5. Notes on Style and File Formats

For a full description of the Journal's style (including referencing) [click here](#).

期刊的文体格式

To download a LaTeX style guide and Class file for this Journal, [click here](#). When submitting your paper to the Manuscript Central site LaTeX files should first be converted into a PDF. Manuscript Central is not able to convert LaTeX files into PDFs directly.

To download a Word template for this journal, [click here](#).

期刊的模板

Authors are requested to provide a Word or LaTeX file of the final version of their accepted paper.

6. Offprints and Reprints

Free article access: Corresponding authors will receive free online access to their article through our website (www.informaworld.com). Reprints of articles published in this journal can be purchased through Rightslink® when proofs are received. If you have any queries, please contact our reprints department at reprints@tandf.co.uk

7. Page Charges

There are no page charges to individuals or institutions.

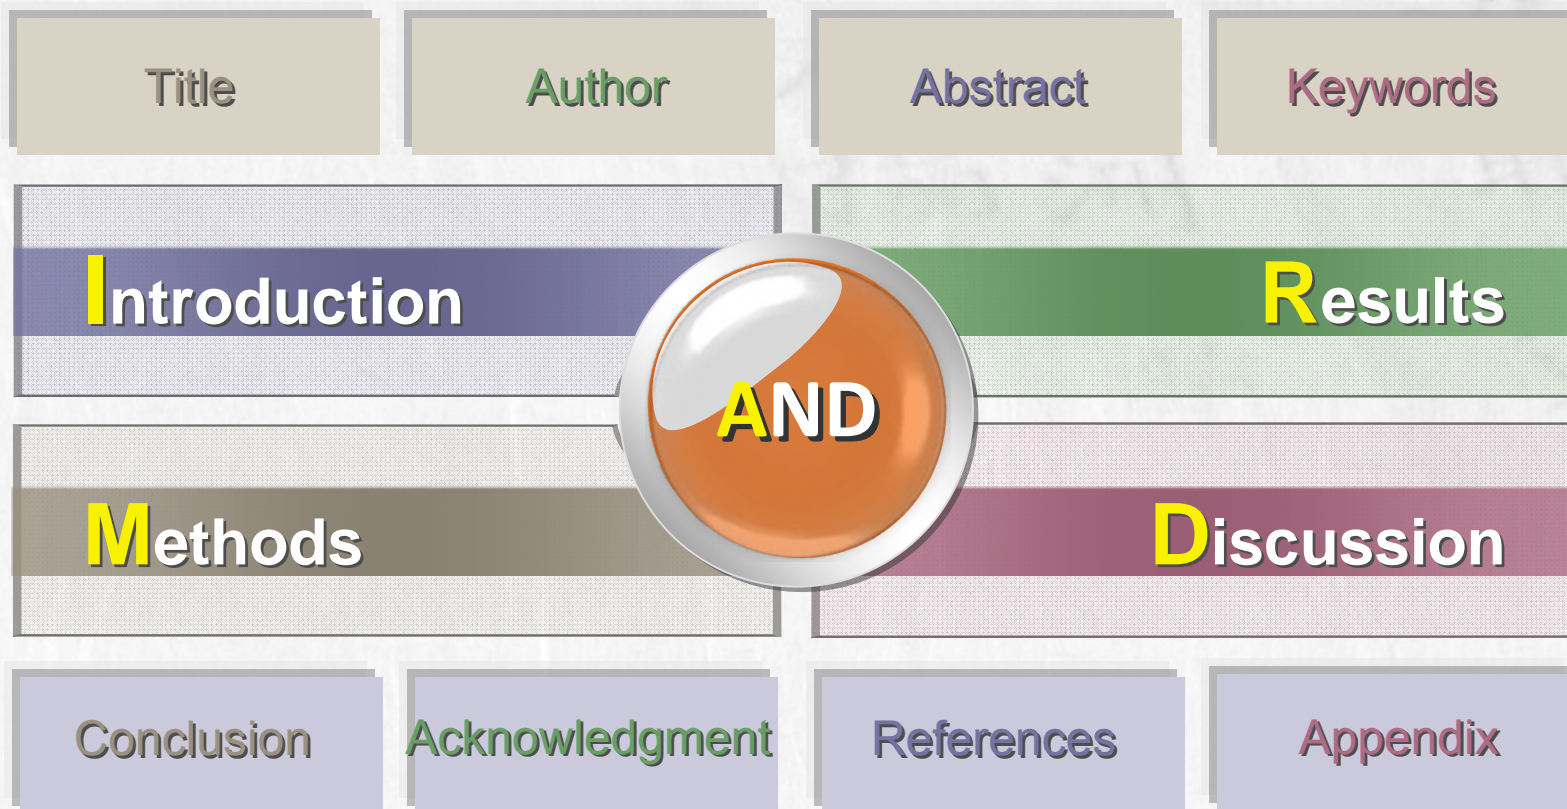

不收取版面费

8. iOpenAccess

Authors whose manuscripts have been accepted for publication have the option to pay a one-off fee to make their article free to read online ie "Open access" via the *International Journal of Remote Sensing* website. Choosing this option will make the article in an institutional or subject repository immediately upon publication.

Discussion 讨论

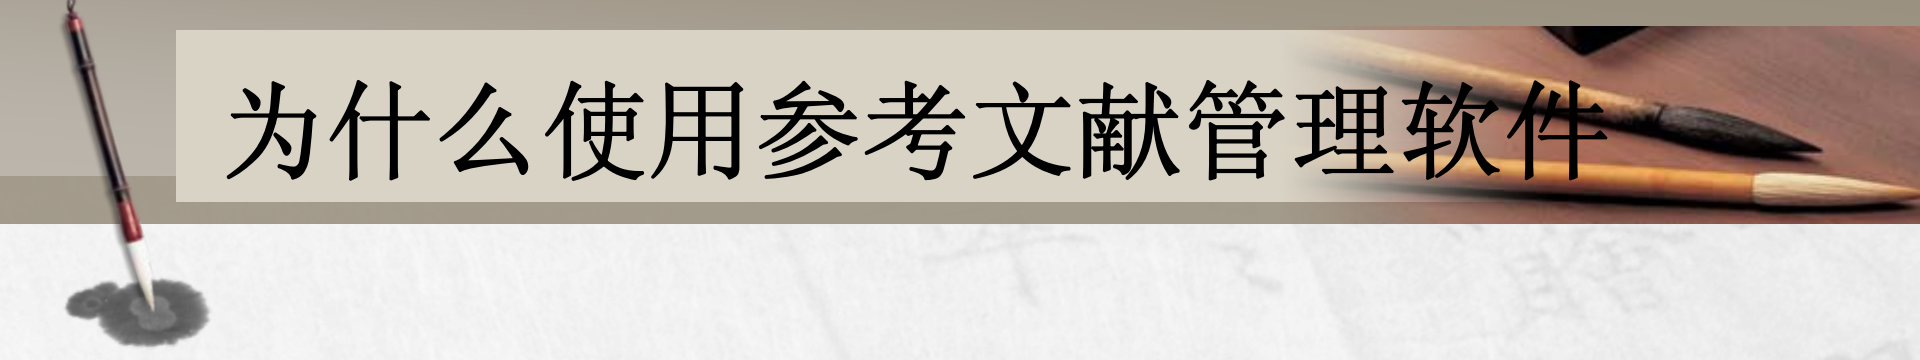

- ☺ 概括自己的研究结果，讨论结果和预期是否一致，不一致为什么？
- ☺ 讨论结果、假设与他人的结果进行比较，分析异同
- ☺ 对结果提出解释、说明、推测
- ☺ 提出研究局限，进一步研究的方向
- ☺ 指出研究的重要性

References 参考文献

- ☺ 研究涉及的重要文献必须引用
- ☺ 引用的参考文献水平一定程度也反映论文水平
- ☺ 参考文献的规范反映论文的规范

五、参考文献的管理

- ☺ 为什么使用参考文献管理软件
- ☺ 参考文献管理软件在写作中的应用
- ☺ 规范参考文献的格式

为什么使用参考文献管理软件

- 😊 易于收集管理文献
- 😊 迅速形成符合期刊要求的论文格式
- 😊 期刊的投稿要求

参考文献管理软件在写作中的应用

☺ 建立参考文献库

- 通过在线检索、数据库导入、手动输入建立文献库
- 保证更新
- 将文献记录、全文和相关的材料都关联起来

☺ 管理文献

- 对文献进行手工分组、使用检索词定制组
- 对阅读文献做简单的文献笔记和标记

☺ 边写文章边引用

- 写作时插入引用
- 随时变更期刊格式

规范参考文献的格式

☺ 期刊的文献格式

- 尽量使用现有的文献格式
软件携带、**endnote**网站更新
- 修改类似的文献格式为己所用
Author-year 格式（哈佛**Harvard**体系）
Numbered 格式（温哥华**Vancouver**体系）

☺ 期刊的模板

- 软件携带、**endnote**网站更新、期刊网页、自制

国内被拒稿件的常见问题

- ☹ 一稿多投
- ☹ 所投文章不在期刊的学科范围内
- ☹ 所投文章格式不符合期刊的投稿要求
- ☹ 未推荐或者推荐不合适的审稿人
- ☹ 语言问题
- ☹ 和审稿人的交流不够
- ☹ 被拒稿件未加以修改就在此呈送

语言问题——锻炼写作技能

☺ 注重积累

- 句型、语法、词汇

☺ 选择本领域10-20篇文章分析总结

- 解析文章各部分内容的结构
- 句子是如何表述的

☺ 勤能补拙

注重和审稿人的交流

- ☺ 要珍惜和审稿人交流探讨的机会，积极回应审稿人。
- ☺ 逐条回应审稿意见，有修改注明修改处，无修改也要做出解释。
- ☺ 对于不赞同的修改意见，要说明理由，但是不要和审稿人辩论。
- ☺ 拒稿后要修改再重投。

怎样才能被接受

- ☺ **Attention to details**
- ☺ **Check and double check your work**
- ☺ **Consider the reviews**
- ☺ **English must be as good as possible**
- ☺ **Presentation is important**
- ☺ **Take your time with revision**
- ☺ **Acknowledge those who have helped you**
- ☺ **New, original and previously unpublished**
- ☺ **Critically evaluate your own manuscript**
- ☺ **Ethical rules must be obeyed**

Thank You!
